Experience

Nov'22 - June'26

Product Designer (CX) | Qure.ai

- As [Qure.ai](#)'s (B2B healthcare) first CX Designer, built the CX function from the ground up, mapping the customer journey from sales to support and creating a shared understanding of customer needs that Product and Engineering could design against
- Investigated low adoption of a key product workflow by mapping the end-to-end deployment to go-live journey with Customer Success and TechOps, identifying fragmented setup as the key friction point
- Simplified a complex deployment setup for frontline healthcare workers, making the entry point to the product easier to understand and follow across deployments
- Designed an in-product guided onboarding flow that broke the setup into clear, visual steps for non-technical users, making the process easier to follow and less prone to errors
- Analysed recurring support issues to uncover product experience gaps behind high effort L1 problems that were being treated as training and documentation issues
- Designed support experiences across WhatsApp, Voice and in product channels, combining rule based bots and LLM agents to help users troubleshoot

Sep'21 - Oct'22

Brand Designer | Empirici

- Designed brand identity systems across packaging, print, digital, websites, and realistic 3D product models to replace photoshoots
- Developed scalable templates and information architecture for collaterals, ensuring consistency and easy to update

Jun'21 - Aug'21

Design Consultant | KHPT

- Designed solutions aimed at educating tuberculosis (TB) patients on the significance of TB treatment & guiding them through the entire treatment process
- Designed communication tools (prompt/flash cards) to support ASHA workers in building trust and facilitating patient-centered discussions in safe spaces
