Product designer with 5+ years in B2B healthcare, across product discovery, systems design and customer experience.
First CX Designer at Qure.ai, where I built the function from scratch and designed guided onboarding and AI-assisted support (WhatsApp, voice, LLM agents) for non-technical frontline workers in low-connectivity environments.

Experience

Nov'22 - June'26

Product Designer | Qure.ai

- Designed support across WhatsApp, voice and in-product channels for global health programs, combining rule-based bots and LLM agents to help users troubleshoot; rolled out to all users on every project that went live, each spanning 20 to 100+ sites
- As Qure.ai's (B2B healthcare) first CX Designer, built the CX function from the ground up, mapping the customer journey from sales to support and creating a shared understanding of customer needs that Product and Engineering could design against
- Investigated low adoption of a key product workflow by mapping the deployment-to-go-live journey as a service blueprint with Customer Success and TechOps, analysing 6-7 past deployments to identify fragmented, custom setups as the key friction point
- Replaced a different custom setup at every site, which could not scale to 100+ systems per project, with 2 fixed configurations that frontline healthcare workers can follow the same way at every deployment
- Designed an in-product guided onboarding flow (Start Screening) that breaks setup into plain-language steps for non-technical users at sites with unreliable or no internet; validated on-site in Kenya with two partner teams
- Conducted qualitative analysis of support tickets using a symptom-versus-cause framework and found 45-53% of tickets each quarter were basic L1 issues caused by missing in-product guidance, not user training; redesigned the product to guide users through problems as they happen

Sep'21 - Oct'22

Brand Designer | Empirici

- Designed brand identity systems across packaging, print, digital, websites, and realistic 3D product models to replace photoshoots
- Developed scalable templates and information architecture for collaterals, ensuring consistency and easy to update

Jun'21 - Aug'21

Design Consultant | KHPT

- Designed solutions aimed at educating tuberculosis (TB) patients on the significance of TB treatment & guiding them through the entire treatment process
- Designed communication tools (prompt/flash cards) to support ASHA workers in building trust and facilitating patient-centred discussions in safe spaces

Education

2019-2021
M.A. (Visual Communication) | Srishti Institute of Art, Design and Technology

2015-2018
VFX | Arena Animation

2015-2018
B.COM | Awadh Girl's Degree College

Skills

Product Design
Product Discovery
System Thinking
Problem Framing
Information Architecture
User Flows
Interaction Design
Wireframing & Prototyping

Research
User Research
User Testing
Qualitative
Quantitative
Contextual Inquiry
Journey Mapping
Service Blueprinting
Behavioural Analytics

Content & Conversational
Conversational Design
UX Writing

Communication & Storytelling
Stakeholder Management
Workshop Facilitation
Cross functional Collaboration

Tools & Languages
Claude Design, Cursor, Figma, Penpot, Paper, Miro, Illustrator, Photoshop, Mixpanel, HTML, CSS
